

Welcome to the Positive Approaches to Dementia Care ECHO

January through June 2025

#### Disclosure

This project is supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under grant number U1QHP53034, Geriatrics Workforce Enhancement Program, for \$1,001,457. This information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by, HRSA, HHS or the U.S. Government.

#### Schedule

- Session 1 Dementia: What's Retained?
- Session 2 What is a Positive Approach to Care?
- Session 3 Sensory Changes
- Session 4 Communicating Effectively
- Session 5 Personal Care
- Session 6 TBD

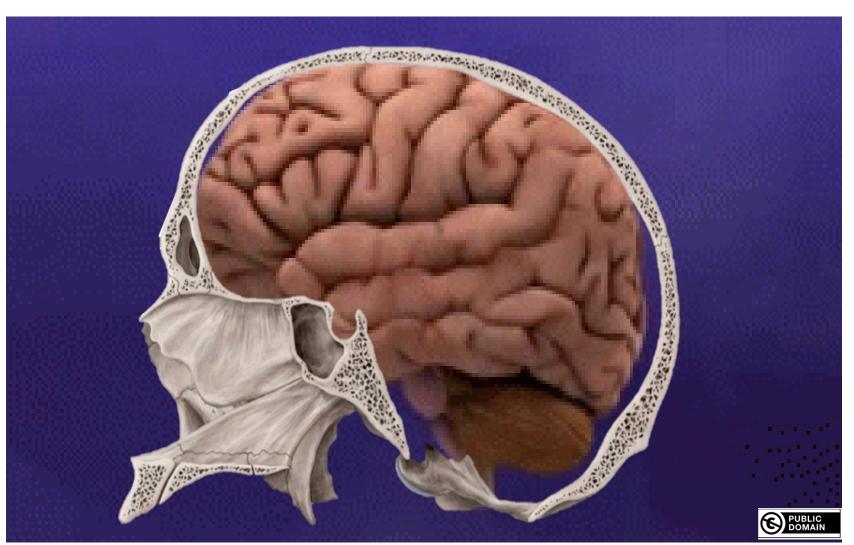

#### Dementia: What's Retained, Not Just What's Lost

Beth A. D. Nolan, Ph.D.

**Chief Public Health Officer** 

**Teepa Snow Positive Approach to Care Mentor** 

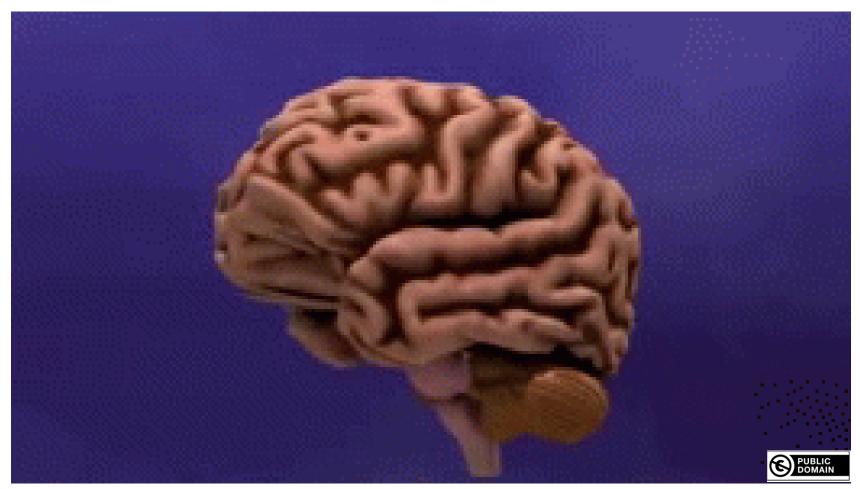

#### As brain cells die the brain shrinks in size

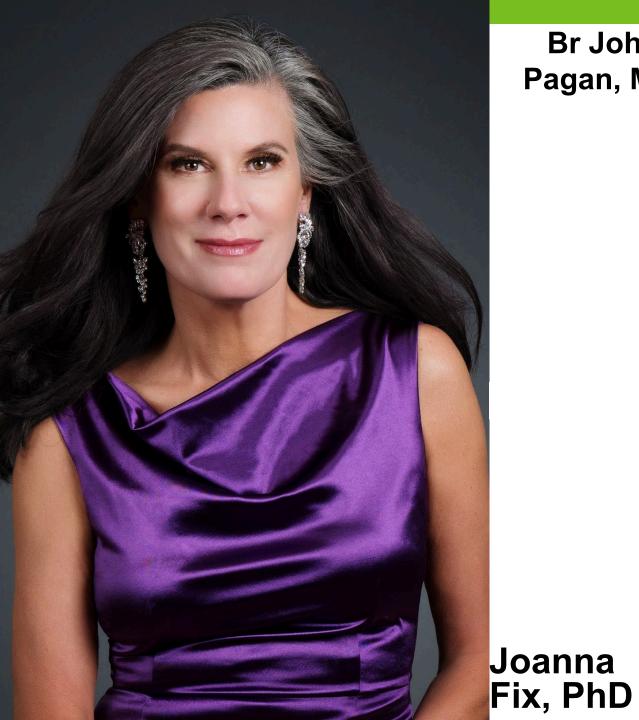

#### Let's see what changes inside:

This work is in the public domain in the United States under the terms of *Title 17, Chapter 1, Section 105 of the US Code*.

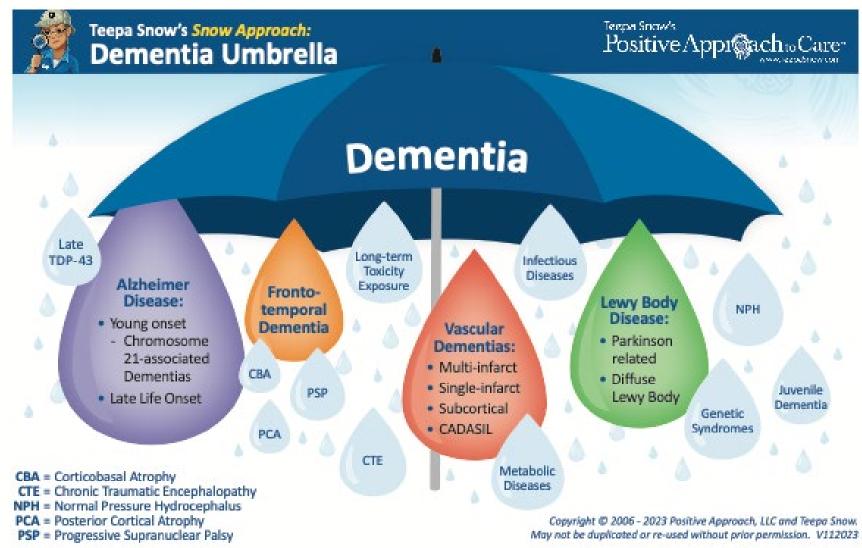

Br John-Richard Pagan, MA-MFT, CG

A better understanding of the difference between dementia and Alzheimer...

#### Four Truths About Dementia:

- 1. At least 2 parts of the brain are dying- one related to memory and another part
- 2. It is chronic can't be fixed
- 3. It is progressive it gets worse
- 4. It is terminal it will kill, eventually

## Four More Truths About Dementia:

- 1. Things do not work the way they used to abilities are changing
- 2. This is a *new normal* can't go back to before
- 3. It is not going to *stabilize* and yet change can be dealt with with support
- 4. Getting *support* that works is essential as things continue to change

#### Hearing Sound Unchanged

BIG Language CHANGE

#### Limit Words – Keep it Straight Forward!

Visual matched WITH verbal using **Positive Action Starters**:

- First, **Reflect:** matched intensity with sincerity (if needed).
- Short & Simple: *It's about time for...* tap your watch/wrist. Or *Here's your socks.* Hold up sock.
- Step by Step: Let's go this way. Point.
- Choice: Coffee or tea? Raise coffee cup then tea bag.
- Help: I could use your help. Implied compliment on skill.
- Try: Let's just try. Pointing to the exercise band.

Acknowledge their response/reaction.... And then WAIT!!!

#### Welcome to the Positive Approaches to Dementia Care ECHO

Session 2: What is a Positive Approach to Care?

Wednesday February 19, 2025 2:00-3:00 p.m. (EST)

# What is a **Positive Approach to Care?**

Teepa Snow, MS, OTR/L, FAOTA Founder and CEO, Positive Approach to Care<sup>®</sup> Co-Founder, Snow Approach Foundation, Inc.

#### The GEMS<sub>®</sub> States of Brain Change:

- Sapphire State: Typical Aging
- Diamond State: Clear, Sharp, Faceted, Highly Structured
- Emerald State: On the Go with Repeating Patterns
- Amber State: Caution Light, Caught in a Moment of Time
- Ruby State: Red Light on Skills, Hidden Depths
- Pearl State: Hidden Within in a Shell, Quiet Beauty

#### Why Use the GEMS<sup>®</sup> States?

They help us:

- Understand the different brain states that we all experience, so we may recognize our own state and its impact on our interactions
- Get beyond the terms *dementia* and *Alzheimer* and speak with less negativity and stereotyping
- Enable us to offer effective support for an individual's specific brain state
- Focus on abilities, rather than just disabilities

## **Sapphire State:**

- Typical aging brain
- Able to be flexible and adaptable
- Able to consider the perspectives of others
- Able to support the other GEMS States

## **Diamond State:**

- Sharp, hard, rigid, inflexible, can cut
- Many facets, still often clear, can really shine
- Are usually either *joiners* or *loners*
- Can complete personal care in familiar place
- Usually can follow simple, prompted schedules
- Misplaces things and can't find them
- Resents takeover or bossiness
- Notices other people's misbehavior and mistakes
- Varies in self-awareness
- Uses old routines and habits
- Controls important roles and territories, uses refusals

## **Emerald State:**

- Changing color
- Not as clear or sharp, more vague
- On the go, need to do
- Flaws may be hidden
- Time traveling is common
- Are usually doers or supervisors
- Do what is seen, but miss what is not seen
- Must be in control, but not able to do it correctly
- Do tasks over and over, or not at all

#### **Amber State:**

- Amber Alert Caution!
- Caught in a moment
- All about sensation and sensory tolerance, easily over or understimulated
- May be private and quiet, or public and noisy
- Limited safety awareness
- Often focused on their own needs and wants
- Lots of touching, handling, tasting, mouthing, manipulating
- Explorers, get into things, invade space of others
- Do what they like and avoid what they do not like

## **Ruby State:**

- Big, repetitive, strong movements are possible
- Rhythm: can sing, hum, pray, sway, or dance
- Notices exaggerated facial expressions
- Can react to emotion in tone of voice
- Limited skill in mouth, eyes, fingers, and feet
- Can mimic or copy big actions and motions
- Monocular vision loss of depth perception
- Balance and coordination very limited
- Basic needs will require monitoring and support

## **Pearl State:**

- Hidden in a shell: still, quiet, easily lost
- Beautiful and layered
- Spends much time asleep or unaware
- Unable to move, bed or chairbound, frequently falls forward or to side
- May cry out or mumble often, increases vocalizations with distress
- Can be difficult to calm, hard to connect with
- Knows familiar from unfamiliar
- Primitive reflexes
- The end of the journey is near, multiple systems failing
- Connections between the physical and sensory world are less strong but we are often the bridge

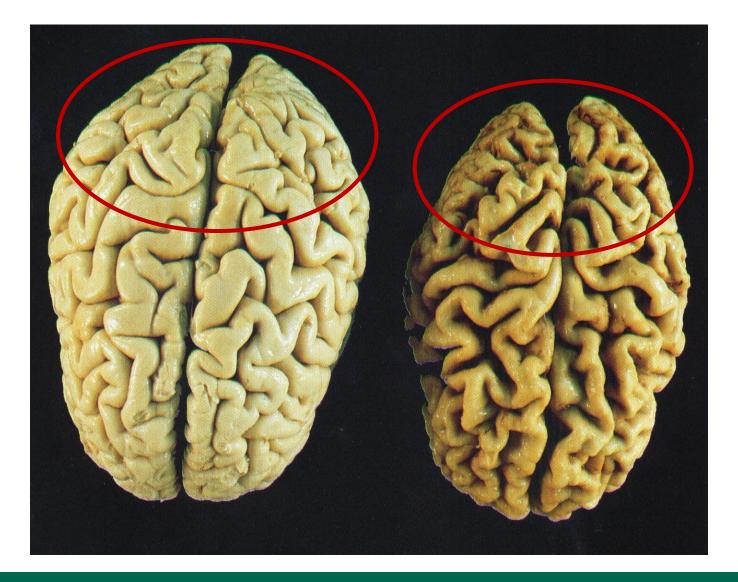

Teepa Snow's GEMS® State Model allows us to recognize how every brain can change based on internal and external factors. While dementia will cause chemical and physical changes to one's brain, other factors, such as discomfort, stress, or hunger, can affect all of our abilities in the moment. Observing these changes and recognizing what abilities are available in this moment are key to connecting and offering the *just right* support.

| Diamond          | Emerald   | Amber   | Ruby   | Pearl  |
|------------------|---|---|--|--|
| Clear – Sharp    | Green   | Changing yellow   | Strong red   | Hidden in a shell  |
| Many facets      | On the go   | Caught in a   | Retains strength,  | Ruled by reflexes  |
| Lives by habit   |   |   |  | Short moments  |
|                  |   |   |  | of connection  |
|                  |   |   |  | Mostly immobile  |
|                  |   | sensory needs   |  | Expresses unmet<br>needs with distress   |
| dismisses errors |   | Lives in the moment   |  | Reacts to touch  |
| Short delays     |   | Copies actions,   | or still   | Extended delays  |
| possible         | at a time   |   | Typically very   | are common   |
| Word-finding     | Misses or   |   | slowed   | Single sounds  |
| -                | skips words   | Language challenged   | Chatty or silent   | or words   |
| and shine        | Travels in time and place   | Resists dislikes,   | Imitates actions   | Can recognize<br>familiar and liked  |
| Scuba vision     | Binocular vision  | Can confuse objects   | Monocular vision   | Limited visual regard  |
|                  | Clear – Sharp<br>Many facets<br>Lives by habit<br>and routine<br>Likes familiar,<br>dislikes change<br>Blames or<br>dismisses errors<br>Short delays<br>possible<br>Word-finding<br>changes<br>Can cut<br>and shine | Clear – Sharp<br>Many facets<br>Lives by habit<br>and routine<br>Likes familiar,<br>dislikes change<br>Blames or<br>dismisses errors<br>Short delays<br>possible<br>Word-finding<br>changes<br>Can cut<br>and shine | Clear - Sharp<br>Many facets<br>Lives by habit<br>and routineGreenChanging yellowLikes familiar,<br>dislikes change<br>Blames or<br>dismisses errorsOn the go<br>with purpose<br>FlawedMore curious<br>than cautiousBlames or<br>dismisses errors<br>Short delays<br>possible<br>Word-finding<br>changes<br>Can cut<br>and shineGreenMore curious<br>than cautiousWord-finding<br>changes<br>Can cut<br>and shineMisses details<br>Misses or<br>skips words<br>Travels in<br>time and placeChanging yellow<br>Caught in a<br>moment of time<br>More curious<br>than cautiousLikes familiar,<br>disses or<br>skips words<br>Travels in<br>time and placeChanging yellow<br>Caught in a<br>moment of timeMore curious<br>than cautiousMore curious<br>than cautiousMisses details<br>Disses or<br>skips words<br>Travels in<br>time and placeMore curious<br>than cautiousMisses or<br>skips words<br>this a timeMisses or<br>skips words<br>this a timeMisses details<br>Disses or<br>skips words<br>this a timeMisses or<br>skips words<br>this a timeMisses details<br>this a timeMisses or<br>skips words<br>this a timeMisses details<br>this a timeMisses or<br>skips words<br>this a timeMisses details<br>this a time<br>this a time<br> | Clear - Sharp<br>Many facets<br>Lives by habit<br>and routine<br>Likes familiar,<br>dislikes change<br>Blames or<br>dismisses errorsGreen<br>On the go<br>with purpose<br>FlawedChanging yellow<br>Caught in a<br>moment of timeStrong red<br>Retains strength,<br>not skillsBlames or<br>dismisses errors<br>Short delays<br>possible<br>Word-finding<br>changes<br>Can cut<br>and shineGreen<br>On the go<br>with purpose<br>FlawedMore curious<br>than cautious<br>Focused on<br>sensory needsBig/strong actions<br>Has rhythmWord-finding<br>changes<br>Can cut<br>and shineMisses or<br>skips words<br>Travels in<br>time and placeChanging yellow<br>Caught in a<br>moment of time<br>Nore curious<br>than cautious<br>Focused on<br>sensory needsImage challenged<br>Canguage challenged<br>Resists dislikes,<br>seeks likesStrong red<br>Retains strength,<br>not skills |

#### Vision Center: Big Changes

## Visual Field Changes by GEMS State:

- Sapphire State: Loss of Peripheral Awareness with Typical Aging
- Diamond State: Scuba Mask/Tunnel Vision
- **Emerald State: Binocular Vision**
- Amber State: Binocular + Object Confusion
- Ruby State: Monocular Vision
- Pearl State: Loss of Visual Regard
